

# 7<sup>th</sup> ASEAN Conference on Primary Health Care

**1<sup>ST</sup>**  
**Announcement**

25-27th March 2011  
Syuen Hotel, Ipoh, Malaysia

## Future in Primary Care?

The **FUTURE IN PRIMARY CARE** is challenging – with increasingly knowledgeable and demanding patients, escalating litigation rates, the potential changes in the medicosocio-economic structure etc.

The Scientific Committee has identified several very important subjects for the primary care physicians e.g. the increasing prevalence of DM and ageing of our population which will shift the burden of DM care and neuropsychiatric care of the elderly to the primary care physician. Dementia, once thought to be a Westerner's disease, is becoming common in ASEAN. Prevalence of atrial fibrillation is certain to rise, and you will have to anticoagulate and monitor many of them.

We will also explore several niches that can potentially be incorporated into your practice, i.e. Aesthetic Medicine, Traditional and Complementary Medicine and Health Screening.

A new feature in this Conference – **Bring Your Own Cases**, allows you to submit / present your own cases for discussion with a panel of experts and fellow colleagues, besides earning a free registration to the Conference. They can be clinical problems, administrative or ethical issues, problems with the MOH, conflicts of interest etc. Remember to submit them at least **1 month** prior to the Conference.

### FOR INFORMATION & REGISTRATION:

Ms Wendy Wong,  
7th ASEAN Conference on Primary Health Care,  
c/o Ipoh Specialist Hospital, 26 Jalan Raja Dihilir,  
30350 Ipoh, Perak, Malaysia.
